Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

1 Nature of operations

Century Iron Ore Holdings Inc. (Century Holdings) was incorporated on September 22, 2010 under the laws of the Province of British Columbia as a wholly owned subsidiary of Century Iron Ore Corporation (Century). The Company is a base metal exploration company with assets in the Provinces of Quebec and Newfoundland and Labrador, Canada.

On October 21, 2010, Century Holdings acquired 100% of the common shares of Grand Century Iron Ore Inc. (Grand Century), Canadian Century Iron Ore Corporation (Canadian Century), Labec Century Iron Ore Inc (Labec) and 0849873 BC Limited (collectively the Properties) from Century by issuing 100 common shares. The transfer by Century of its interest in the Properties to Century Holdings was an internal reorganization among related parties and, as such, these condensed consolidated interim financial statements have been prepared on a continuity of interest basis. Accordingly, the financial statements of Century Holdings are prepared and presented as if it had been the holding company of the Properties for all periods presented.

Century Holdings completed a reverse takeover (RTO) of Century Iron Mines Corporation (the Company), formerly known as Red Rock Capital Corp. (Red Rock), on May 18, 2011. Red Rock was incorporated under the Canada Business Corporations Act on July 10, 2007. It was classified as a Capital Pool Company, as defined in Policy 2.4 of the TSX Venture Exchange Inc. and, accordingly, had no significant assets other than cash and no commercial operations. Red Rock changed its name to Century Iron Mines Corporation and its fiscal year end to March 31 on May 16, 2011.

On September 19, 2011, the Company completed its gradation from the TSX Venture Exchange to the Toronto Stock Exchange (the "TSX") and the shares of the Company commenced trading on TSX under the symbol "FER".

2 Basis of preparation and adoption of International Financial Reporting Standards (IFRS)

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 *Interim Financial Reporting*. These are the Company's IFRS condensed consolidated interim financial statements for part of the period covered by the first annual financial statement and IFRS 1 *First-time Adoption of International Financial Reporting Standards* has been applied. The Company has consistently applied the same accounting policies in its opening IFRS statement of financial position at April 1, 2010 and throughout all periods presented, as if these policies had always been in effect. Note 4 discloses the impact of the transition to IFRS on the Company's reported financial position, financial performance and cash flows.

The policies applied in these condensed consolidated interim financial statements are based on IFRS issued and effective as of November 11, 2011, the date on which the Board of Directors approved these interim financial statements. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending March 31, 2012 could result in restatement of these condensed consolidated interim financial statements, including the transition adjustments recognized on changeover to IFRS.

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

The interim consolidated financial statements should be read in conjunction with Century Holdings' pre-changeover Canadian generally accepted accounting principles (Canadian GAAP) annual financial statements for the year ended March 31, 2011, and in consideration of the IFRS transition disclosures included in note 4.

3 Summary of significant accounting policies

The significant accounting policies used in the preparation of these condensed consolidated interim financial statements are described below.

Basis of measurement

The condensed consolidated interim financial statements have been prepared under the historical cost convention, except for the revaluation of certain financial assets and financial liabilities to fair value.

Principles of consolidation

The financial statements of the Company consolidate the accounts of Century Iron Mines Corporation and its subsidiaries. All intercompany transactions, balances and unrealized gains and losses from intercompany transactions are eliminated on consolidation.

Subsidiaries are those entities which the company controls by having the power to govern the financial and operating policies. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the company controls another entity. Subsidiaries are fully consolidated from the date on which control is obtained by the company and are de-consolidated from the date that control ceases.

The Company's financial statements consolidate its subsidiaries which comprise the following:

Name of entity	Country of incorporation	Ownership	
		Direct	Indirect
Century Holdings	Canada	100%	-
Grand Century	Canada	-	100%
Canadian Century	Canada	-	100%
Labec	Canada	-	100%
0849873 BC Limited	Canada	-	100%
Century Iron Mines Hong Kong Holdings Limited	Hong Kong	-	100%

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

Translation of foreign currency

These condensed consolidated interim financial statements are presented in Canadian dollars, which is the Company's presentation currency.

Items included in the financial statements of the Company and each of the Company's subsidiaries are measured using the currency of the primary economic environment in which the entity operates (the functional currency). Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities not denominated in the functional currency of an entity are recognized in the profit or loss.

Assets and liabilities of entities with functional currencies other than the Canadian dollar are translated into the presentation currency at the period end rates of exchange, and the results of their operations are translated at the average rates of exchange for the period. The resulting translation adjustments are recognized in other comprehensive income as cumulative translation adjustments.

The functional currency of the Company and its subsidiaries in Canada is the Canadian dollar and the functional currency of its subsidiary in Hong Kong is the Hong Kong dollar.

Financial instruments

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

Financial assets and liabilities are offset and the net amount is recorded in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle on a net basis, or realize the asset and settle the liability simultaneously.

At initial recognition, the Company classifies its financial instruments in the following categories depending on the purpose for which the instruments were acquired:

- i) **Loans and receivables:** Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Company's loans and receivables comprise accounts receivable and cash and cash equivalents, and are included in current assets due to their short-term nature. Loans and receivables are initially recognized at the amount expected to be received, less, when material, a discount to reduce the loans and receivables to fair value. Subsequently, loans and receivables are measured at amortized cost using the effective interest method less a provision for impairment.

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

- ii) Financial liabilities at amortized cost: Financial liabilities are initially recognized at the amount required to be paid, less, when material, a discount to reduce the payables to fair value. Subsequently, financial liabilities are measured at amortized cost using the effective interest method.

Financial liabilities are classified as current liabilities if payment is due within twelve months. Otherwise, they are presented as non-current liabilities.

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated amortization and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost can be measured reliably. The carrying amount of a replaced asset is derecognized when replaced. Repairs and maintenance costs are charged to the profit or loss during the period in which they are incurred.

During the period, the Company amortized property, plant and equipment on a straight-line basis. The assets' useful lives are as follows:

Drilling and field equipment	10 years
Camp	5 years
Leasehold improvements	5 years
Computer and office equipment	2 – 5 years
Vehicles	5 years

Share-based payment transactions

The Company operates share option plans for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Company's operations. Directors, officers, employees, consultants and other eligible person receive remuneration in the form of share-based payment transactions, whereby the eligible person render services as consideration for equity instruments (equity-settled transactions).

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to the profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

No expense is recognised for awards that do not ultimately vest, except for equity-settled transactions where vesting is conditional upon a market or non-vesting condition, which are treated as vesting irrespective of whether or not the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. This includes any award where non-vesting conditions within the control of either the Group or the employee are not met. However, if a new award is substituted for the cancelled award, and is designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph. All cancellations of equity-settled transaction awards are treated equally.

Deferred costs

Costs incurred to raise capital are written off as a charge to capital upon completion of each capital raising.

Costs directly attributable to the completion of business acquisitions are expensed.

Exploration and evaluation expenditures

Direct and indirect acquisition and exploration expenditures associated with mineral exploration properties are capitalized when incurred. During the exploration period, exploration and evaluation expenditures are not amortized.

Upon completion of a technical feasibility study and when commercial viability is demonstrated, capitalized exploration and evaluation assets are transferred to and classified as mineral property development expenditures. Exploration and evaluation assets shall be assessed for impairment before such reclassification.

Income taxes

Income tax comprises current and deferred tax. Income tax is recognized in the profit or loss except to the extent that it relates to items recognized directly in equity, in which case the income tax is also recognized directly in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

In general deferred tax is recognized in respect of temporary differences arising between the tax basis of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the end of the reporting period and are expected to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognized to the extent that it is probable that the assets can be recovered.

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

Deferred income tax is provided on temporary differences arising on investments in subsidiaries except where the timing of the reversal of the temporary differences is controlled by the Company and it is probable that the temporary difference would not reverse in the foreseeable future.

Cash and cash equivalents

Cash and cash equivalents consist of deposit accounts with chartered banks in Canada and Hong Kong, with an original maturity of three months or less.

Earnings per share

Basic earnings per share is calculated by dividing net loss (income) attributable to equity owners of the Company by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated using the treasury stock method, whereby the weighted average number of common shares outstanding is increased to include potentially issuable common shares from the assumed exercise of common share purchase options and warrants, if dilutive.

Critical accounting estimates and judgments

The Company makes estimates and assumptions concerning the future that will, by definition, seldom equal to the actual results. The following are the estimates and judgments applied by management that most significantly affect the Company's financial statements. These estimates and judgments have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

i) Valuation of mineral properties and exploration and development properties

The Company carries its mineral properties at cost less a provision for impairment. The Company capitalizes exploration costs, which are related to specific projects, until the commercial feasibility of the project is determinable. The costs of each property and related capitalized exploration and development expenditures are amortized over the economic life of the property on a units-of-production basis. Costs are charged to operations when a property is abandoned or when impairment in value that is other than temporary has been determined.

The Company reviews the carrying values of mining properties and related expenditures whenever events or changes in circumstances indicate that their carrying values may not be recoverable. In undertaking this review, management is required to make significant estimates of, amongst other things, future production and sale values, unit sales prices, future operating and capital costs and reclamation costs to the end of the mine's life. These estimates are subject to various risks and uncertainties, which may ultimately have an effect on the expected recoverability of the carrying values of the mining properties and related expenditures.

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

ii) Share-based payment transactions

The Company grants share options to directors, officers, employees and consultants of the Company under its incentive stock option plan. The fair value of share options is estimated using the Black-Scholes option pricing model and are expensed over their vesting periods. In estimating fair value, management is required to make certain assumptions and estimates such as the life of options, volatility and forfeiture rates. Changes in assumptions used to estimate fair value could result in materially different results.

4 Transition to IFRS

The Company adopted IFRS as its basis of accounting on April 1, 2011. The Company's transition date is April 1, 2010 (the transition date) and the Company has prepared its opening IFRS statement of financial position at that date. These financial statements have been prepared in accordance with the accounting policies described in note 3 and in accordance with the requirements of IFRS 1 First time Adoption of IFRS, which is applicable upon first-time adoption of IFRS.

The effect of the Company's transition to IFRS is summarized in this note as follows:

i) Initial elections on transition

The Company has not applied any of the optional transition exceptions and exemptions to full retrospective application of IFRS.

ii) Reconciliations of Canadian GAAP to IFRS

IFRS 1 requires an entity to reconcile equity, comprehensive income and cash flows for prior periods. The Company's first time adoption of IFRS did not have an impact on the statements of financial position, statements of loss and comprehensive loss, and the total operating, investing or financing cash flows and no reconciliation has been prepared.

Duncan Lake property

On May 20, 2008, Canadian Century entered into an option and joint venture agreement (the Augyva Agreement) with Augyva Mining Resources Inc. (Augyva) to have an option to obtain a 51% interest in the Duncan Lake property once \$6.0 million has been funded on or before the fourth anniversary of the date of the Augyva Agreement, of which \$1.5 million is to be funded within the first anniversary of the Augyva Agreement. The Company completed its funding commitment of \$6.0 million on the Duncan Lake property last year and, as a result, obtained a 51% interest in this property.

Canadian Century has an additional option to obtain a further 14% of the Duncan Lake property by spending an aggregate of \$14.0 million in exploration costs, construction, and/or operating costs or completing a feasibility report on or before the eighth anniversary of the date of the Augyva Agreement.

Attikamagen property

On May 12, 2008, Labec entered into an option and joint venture agreement (the Champion Agreement) with Champion Minerals Inc., which superseded an initial agreement between the parties, dated March 26, 2008 (the Initial agreement), to have an option to obtain a 51% interest in the Attikamagen property by funding \$2.5 million each year for three years from the date of the Initial Agreement. Labec has obtained an extension of one year in 2010, which effectively halted any payments payable for year two. Therefore, the total commitment over four years is \$7.5 million. At the completion of this funding and on exercise of the option, Labec will earn the ownership interest in the Attikamagen property and a joint venture will be formed.

There is an option to obtain a further 9% interest in the Attikamagen property by putting additional funding of \$2.5 million by March 26, 2013 (for 5% of the additional interest) and an additional \$3.0 million by March 26, 2014 (for 4% of the additional interest).

7 Reverse acquisition

On May 18, 2011, Century Holdings completed (1) a brokered private placement and non-brokered private placement at an issue price of \$2.50 per subscription receipt for gross proceeds of \$33,462,065 and (2) an employee offering at an issue price of \$2.25 (for 18 months lock-up) or \$2 (36 months lock-up) per subscription receipt for gross proceeds of \$32,500. Transaction costs related to the offering amounted \$2,722,601 (which comprises cash fee of \$1,842,151 and 686,243 warrants of \$880,450). Each such subscription receipt will entitle the holder to acquire one common share in the capital of Century Holdings.

On May 18, 2011, the Company issued the 61,370,738 common shares to the former shareholders of Century Holdings in exchange of 100% interest in Century Holdings.

As a result of the transaction, the former shareholders of the Century Holdings owned 99.55% of the outstanding shares of the Company. In accordance with IFRS 3, Business Combination, the substance of the transaction is a reverse acquisition of a non-operating company. The transaction does not constitute a business combination as the Company before the RTO does not meet the definition of a business under the standard. As a result, the transaction is accounted for as a capital transaction with Century Holdings being identified as the accounting acquirer and the equity consideration being measured at fair value. The resulting statement of financial position is presented as a continuance of Century Holdings and comparative figures presented in the financial statements after the reverse acquisition are those of Century Holdings.

IFRS 2 applies to transactions where an entity grants equity instruments and cannot identify specifically some or all of the goods or service received in return. Because the Company has issued shares with a value in excess of the assets received, IFRS 2 would indicate that the difference is recognized in comprehensive loss as reverse acquisition transaction cost. The amount assigned to reverse acquisition transaction cost of \$746,602 is the difference between the fair value of the consideration and the net identifiable assets of the Company acquired by Century Holdings and included in the consolidated statement of comprehensive loss.

The fair value of the consideration is determined based on the percentage of ownership the legal parent's shareholders have in the combined entity after the reverse takeover transaction. This represents the fair value of the shares that Century Holdings would have had to issue for the ratio of ownership interest in the combined entity to be the same, if the transaction had taken the legal form of Century Holdings acquiring 100% of the shares in the Company. The percentage of ownership the legal parent's shareholders had in the combined entity is 0.45% after the issue of 61,370,738 shares of the Company to Century Holdings shareholders. As the share options and warrants granted prior to RTO remains exercisable after the completion of RTO, the fair value of the share options and warrants at the date of RTO are also included as part of the consideration transferred (note 8).

- c) On May 18, 2011, the Company issued 4,641,410 common shares to MinMetals Exploration & Development (Luxembourg) Limited S.à.r.l. (MinMetals) at an issue price of \$2.624 per common share for gross proceeds of \$12,180,403. The common shares are subject to an 18 months lock-up.

The net proceeds of \$11,153,185 were allocated to share capital after the deduction of cash fee of \$669,922 and 278,485 warrants of \$357,296 to the finder.

- d) On May 18, 2011, the Company issued 2,075,221 common shares to non-brokered subscribers at an issue price of \$2.916 per common share for gross proceeds of \$6,051,094.

The net proceeds of \$5,566,763 were allocated to share capital after the deduction of cash fee of \$327,250 and issued 122,433 warrants of \$157,081 to the finder.

- e) On May 18, 2011, the Company issued 1,273,201 common shares to employees and consultants at an issue price of \$2.333 per common share for net proceeds of \$2,970,000, which were allocated to the share capital.

- f) On May 31, 2011, 6,859 share options were exercised at an exercise price of \$2 per share, resulting in the issue of 6,859 common shares for a total consideration of \$13,718. An amount of \$9,837 was transferred from the share option reserve to share capital upon the exercise of the share options.

On August 17, 2011, 13,718 share options were exercised at an exercise price of \$2 per share, resulting in the issue of 13,718 common shares for a total consideration of \$27,436. An amount of \$19,674 was transferred from the share option reserve to share capital upon the exercise of the share options.

Loss per share

The basic loss per share calculated amount is the same as the fully diluted loss per share amount as the effect of any additional shares would be anti-dilutive, because the Company is in a loss position.

Share options

The share options issued and outstanding as of September 30, 2011 are as follow:

	Number of options \$	Weighted average exercise price \$
Balance - April 1, 2011	-	-
Deemed replacement of options granted on November 24, 2009 (i)	27,436	2.00
Options granted on May 18, 2011 (ii)	5,500,000	2.92
Exercised during the period	(20,577)	2.00
	<hr/>	<hr/>
Balance - September 30, 2011	5,506,859	2.92

- i) On November 24, 2009, the Company granted share options to its directors and officers to acquire an aggregate of 27,436 common shares (after consolidation of 10 to 1) at a price of \$2.00 per share exercisable until November 23, 2014. Notwithstanding the foregoing, the options shall expire on the date that is later of (i) 12 month after the completion of qualifying transaction as defined by the TSX Venture Exchange Inc. and (ii) 90 days following the date the optionee ceases to be a director, officer or technical consultant of the Company. Upon the completion of RTO on May 18, 2011 which qualified as a qualifying transaction, the expiry date of the options has been shortened to May 17, 2012. As the options remains exercisable after the completion of RTO, the fair value of the options at the date of RTO was included as part of the consideration transferred by Century Holdings in the RTO. On May 18, 2011, the fair value of the options was estimated at \$39,349 using the Black-Scholes option pricing model. The assumptions used were as follows: risk-free interest rate of 1.04%, dividend yield of 0%, volatility of 94% and expected life of 1 year.
- ii) The Company has adopted an incentive stock option plan (the Plan) which is administered by the board of directors of the Company. The Plan provides that the board of directors of the Company may from time to time, in its discretion and in accordance with TSX Venture Exchange Inc. or TSX requirements, grant to directors, officers, employees and consultants to the Company, options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed 10% of the issued and outstanding common shares. Such options will be exercisable for a period of up to 5 years from the date of grant. No more than an aggregate of 5% of the issued and outstanding common shares may be granted to any one individual in any 12 month period. No more than an aggregate of 2% of the issued and outstanding common shares may be granted to any one consultant in any 12 month period. No more than an aggregate of 2% of the issued and outstanding common shares may be granted to persons employed to provide investor relations activities, in any 12 month period. Options issued pursuant to the Plan will have an exercise price determined by the directors of the Company provided that the exercise price shall not be less than the price permitted by the TSX Venture Exchange Inc or TSX.

On May 18, 2011, 5,500,000 were granted to directors, employees and consultants. The fair value of the options granted has been estimated at the date of grant using the Black-Scholes option pricing model, using

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

the following assumptions: an average risk free interest rate of 2.06%, dividend yield of 0%, volatility of 94% and an expected life of 4 years. 1/3 of the options vested on the issue date of the option, 1/3 of the options will vest on the first anniversary of the option date and 1/3 will vest on the second anniversary of the option date. The fair value of the options was estimated at \$ 10,708,502. The impact on share-based payment was \$5,545,346 for the six months ended September 30, 2011 (For the three months ended September 30, 2011: \$1,346,488).

The exercise prices and exercise periods of the share options outstanding as of September 30, 2011 are as follow:

Number of options	Exercise price	Exercise period
6,859	2.00	November 24, 2009 to May 17, 2012
<u>5,500,000</u>	2.92	May 18, 2011 to May 17, 2016

	<u>521,705</u>	<u>-</u>	<u>1,873,191</u>	<u>-</u>

11 Financial risk factors

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk including interest rate risk, foreign currency exchange risk and commodity price risk.

Risk management is carried out by the Company's management team with guidance from the board of directors. The board of directors also provides regular guidance for overall risk management.

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and receivables. Cash and cash equivalents are held with a major Canadian chartered bank, from which management believes the risk of loss to be minimal. Financial instruments included in accounts receivable consist of deposits held with service providers.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2011, the Company had cash of \$90,423,441 to settle accounts payable and accrued liabilities of \$6,482,095. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors, such as interest rates, foreign currency exchange rates and commodity prices.

Century Iron Mines Corporation

Notes to Condensed Consolidated Interim Financial Statements

(Unaudited)

September 30, 2011

(expressed in Canadian dollars)

Interest rate risk

The Company has cash balances and no interest bearing debt. The Company's current policy is to invest excess cash in interest bearing accounts of a reputable Canadian chartered bank. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its reputable Canadian chartered bank.

Foreign currency exchange risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. Management believes the foreign currency exchange risk derived from currency conversions is low and, therefore, does not hedge its foreign currency exchange risk.

12 Capital management

The Company considers its capital structure to consist of share capital and accumulated deficit, which, as at September 30, 2011, totalled \$98,913,237 and deposit received from a related party of \$8,356,640. When managing capital, the Company's objective is to ensure the entity continues as a going concern as well as to maintain optimal returns to the shareholder and benefits for other stakeholders. Management adjusts the capital structure, as necessary, in order to support the acquisition, exploration and development of its mineral properties. The board of directors does not establish a quantitative return on capital criteria for management but, rather, relies on the expertise of the Company's management team to sustain the future development of the business.

The properties in which the Company currently has exploration options are in the exploration stage. As such, the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration program and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts when economic conditions permit it to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is appropriate. The Company's capital management objectives, policies and processes have remained unchanged during the six months ended September 30, 2011. The Company is not subject to externally imposed capital requirements.

13 Subsequent events

On October 30, 2011, the Company and WISCO signed an agreement to extend the signing dates for the individual definitive business venture agreements (the “Project Agreements”) with respect to the Duncan Lake, Sunny Lake and Attikamagen iron-ore projects contemplated by the joint venture agreement dated August 30, 2011 between WISCO and the Company. Pursuant to the extension agreement, the parties have agreed to an extension of the signing dates for the Project Agreements until November 29, 2011.
