May 19, 2011 – Toronto, Ontario

Century Iron Mines Corporation (the “**Company**” and formerly “Red Rock Capital Corp.”) (**TSXV: FER**), formerly a capital pool company, is pleased to announce that, on May 18, 2011, it has completed its qualifying transaction (the “**Qualifying Transaction**”) originally announced on November 18, 2010. The Qualifying Transaction involved the acquisition of Century Iron Ore Holdings Inc. (“**Century Holdings**”) through an amalgamation completed on May 18, 2011, together with concurrent financings totaling \$115.5 million. The concurrent financings included a \$60.9 million investment by WISCO International Resources Development & Investment Limited (“**WISCO**”) for a 24.99% interest and a \$12.2 million investment by MinMetals Exploration & Development (Luxembourg) Limited S.à.r.l. A full description of the Qualifying Transaction has been provided in the Company’s filing statement dated May 5, 2011, as filed on SEDAR (the “**Filing Statement**”). The Company’s stock symbol has changed from “RRD.P” to “FER” in connection with the completion of the Qualifying Transaction.

Mr. Sandy Chim, President and Chief Executive Officer of the Company, comments:

“The completion of the Qualified Transaction and the concurrent financings totaling \$115.5 million, solidifies a significant milestone for Century Iron Mines Corporation. The transaction brings together promising Canadian iron ore assets, global strategic partners in WISCO and Minmetals and top tier Canadian financial institutional investors to support our vision of becoming a major iron ore producer in Canada. Iron ore mining is a scale business and scale is matter of capital. Scale reduces capital and operating expenditures per tonne and is the essential competitive advantage in global markets. With scale, our business objective will be to operate competitively at any point of a commodity cycle.

Our assets have the potential to deliver world class scale. Our strategic partners, WISCO and Minmetals, represent the strength of China in terms of steel making, mining and commodity trading. China is a top global end user and trader and has the end-product buying power and financing power to provide access to the necessary multi-billion dollar capital required to bring our major projects to reality. The participation of WISCO and Minmetals in the financing, exploration and development and production of our projects is a vote of confidence by China in our company, in Canadian iron ore assets and in Canada.

Our financing has been well supported by top tier Canadian financial institutions. We are confident that our early investors, together with additional financial institutions, will join with our Chinese partners to finance the Company at each level of development and delivery of iron product to China. We are proud to be a Canadian company building an iron ore operation with the intention to make a significant

contribution to the revitalization of our iron ore industry, build value for our shareholders and deliver an excellent return on our shareholders' investments.

Substantial exploration programs undertaken on our projects this year from our own sources prior to the closing of the recent financings have advanced our projects. The closing of the financings in connection with the Qualifying Transaction now provides us with the necessary resources, funding and the expertise of our strategic partners to add significant value to our assets and advance our projects in the most expeditious and professional manner.”
