Impairment assessment of iron ore properties

At March 31, 2016, with the weakening iron ore market condition, an impairment review was performed on both the Duncan Lake property and Sunny Lake property, and the review has resulted in impairment charges of \$17,494,260 and \$3,160,465 to the Duncan Lake property and Sunny Lake property, respectively. After the impairment charges, the net book value of both properties became nil. Duncan Lake property

On May 20, 2008, the Company's wholly-owned subsidiary Canadian Century Iron Ore Corporation ("Canadian Century") entered into an option and joint venture agreement (the "Augyva Agreement") with Augyva Mining Resources Inc. ("Augyva") to have an option to obtain a 51% interest in the Duncan Lake property once \$6.0 million has been funded on or before the fourth anniversary of the date of the Augyva Agreement. The Group completed its funding commitment of \$6.0 million on the Duncan Lake property in November 2010 and, as a result, obtained a 51% interest in this property. Canadian Century recognized its share of costs incurred in the Duncan Lake property. Canadian Century had an additional option to obtain a further 14% of the Duncan Lake property by spending an additional \$14.0 million in exploration costs, construction, and/or operating costs or completing a feasibility report on or before the eighth anniversary of the date of the Augyva Agreement. In October 2012, Canadian Century notified Augyva that it has expended a further \$14.0 million on the project under the Augyva Agreement. The transfer registration of 14% was completed in May 2013.

As of September 30, 2020, the Group has a 68% registered interest in the Duncan Lake property.

Sunny Lake property

On December 19, 2011, the Company and WISCO International Resources Development & Investment Limited ("WISCO") entered into the Sunny Lake joint venture agreement (the "Sunny Lake JV Agreement") that governs the joint venture formed between the Company and WISCO for the exploration and development of the Sunny Lake property (the "Sunny Lake Joint Venture"). The operating company for the Sunny Lake Joint Venture, WISCO Century Sunny Lake Iron Mines Limited ("WISCO Century Sunny Lake" or the "Operator"), was incorporated on June 29, 2012. The Sunny Lake property was held in trust for 0849873 B.C. Ltd. ("B.C. Ltd."), a wholly-owned subsidiary of the Company, and WISCO Canada Sunny Lake Resources Development & Investment Limited ("WISCO Sunny Lake") in accordance with their interests in the Sunny Lake Joint Venture under the Sunny Lake JV Agreement.

On November 28, 2012, the Company and WISCO entered into a closing agreement (the "Sunny Lake Closing Agreement"), providing WISCO Sunny Lake with an option to purchase from B.C. Ltd. up to a 40% interest in the Sunny Lake Joint Venture.

On April 2, 2013, pursuant to the Sunny Lake Closing Agreement, WISCO Sunny Lake acquired a 17.1% interest in the Sunny Lake property for the consideration of \$8,612,875 paid to B.C. Ltd. The share units have been allocated to the grantees under three types of vesting conditions: time-based targets, operational targets and financial targets.

- (i) **Time-based target**: the share units will be fully vested if the individual grantee is still employed by the Company on the third anniversary of the grant date.
- (ii) **Operational target**: the share units will be vested upon the achievement of certain mining and exploration-related targets set out by the Board. The actual amount of share units to be vested under these operational targets will vary depending on the level of performance relative to the targets based on an award multiplier of 0% to 200%. The vesting date of the share units will be the earlier of: five years from the grant date or the achievement dates of the respective operational targets. Management estimated that the period of vesting would occur between November 2018 and March 2020.
- (iii) **Financial target**: the share units will be vested if the two-year average annualized cash costs of iron ore produced and shipped for the projects of the Company or under its joint arrangements meet certain target set out by the Board and the two-year earnings before interest, taxes, depreciation and amortization (EBITDA) of the projects is positive. The actual amount of share units to be vested under the financial target will vary depending on the level of performance relative to the target based on an award multiplier of 0% to 200%. The vesting date of the share units will be the earlier of: five years from the grant date or the achievement date of the financial target. Management estimated that the period of vesting would occur between November 2018 and March 2020.

The fair value of the share units granted was estimated based on the market price of the Company's shares on the date of grant.

25. Financial risk management

The Group's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk including interest rate risk, foreign currency exchange risk and capital market risk.

Risk management is carried out by the Group's management team with guidance from the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

The Group's financial assets and financial liabilities have been classified into categories that determine their basis of measurement. As at September 30, 2020 and March 31, 2020, the Group's financial instruments are comprised of cash and cash equivalents, short term bank deposits, marketable securities, investment in other equity instruments, trade and other receivables, trade and other payables. With the exception of cash and cash equivalents, marketable securities and investment in other equity instruments, all other financial instruments of the Group are measured at amortized cost.

The following table shows the carrying values, fair values and fair value hierarchy of the Group's financial instruments that are measured at fair value as at September 30, 2020 and March 31, 2020:

	September 30, 2020 Carrying		March 31, 2020 Carrying		
	Level	value \$	Fair value \$	value \$	Fair value \$
Marketable securities	1	2,344,254	2,344,254	204,547	204,547
Investment in other equity instruments	3	66,350	66,350	70,306	70,306
	_	2,410,604	2,410,604	274,853	274,853

Fair values of financial instruments are determined by valuation methods depending on hierarchy levels as defined below:

Level 1 – Quoted market price in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted market prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. observed prices) or indirectly (i.e. derived from prices).

Level 3 – Inputs for the assets or liabilities are not based on observable market data.

The movements in fair value measurements within Level 3 are as follows:

	\$
Balance – March 31, 2019	66,442
Exchange differences recognized in profit or loss	3,864
Balance – March 31, 2020	70,306

Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Group's credit risk is primarily attributable to cash, marketable securities and receivables. Cash and cash equivalents and short term bank deposits are held with major banks, and marketable securities are held with a reputable securities broker with investment guidelines set by management which are intended to limit credit risk. The Group's receivables mainly represented an amount owing from its joint ventures, Labec Century and WISCO Century Sunny Lake. Management believes the risk of loss to be minimal.

The Group measures the loss allowance for trade receivables at an amount equal to lifetime ECL. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. The Group has recognized a loss allowance of 100% against all trade receivables over one year past due because historical experience has indicated that these receivables are generally not recoverable. No provision has been made for trade receivables that are past due for less than one year as these receivables are generally recoverable based on historical experience.

Liquidity risk

The Group's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As of September 30, 2020, the Group has cash and cash equivalents and short-term bank deposits of \$5,180,056 (March 31, 2020: \$3,687,125) to settle current liabilities of \$1,469,413 (March 31, 2020: \$2,091,596). Most of the Group's financial liabilities have contractual maturities of 30 days or less and are subject to normal trade terms. The Group's objective for liquidity risk management is to maintain sufficient liquid financial resources to fund the consolidated balance sheets, pursue growth and development strategies, and to meet commitments and obligations in the most cost-effective manner possible. The Group achieves this by maintaining sufficient cash and cash equivalents and managing working capital. The Group monitors its financial position on a monthly basis at minimum. The Group's operations may not generate sufficient cash flow to fund obligations. The Company may need to take additional measures to increase its liquidity and capital resources, including obtaining additional debt or equity financing, pursuing joint-venture arrangements, or other financing arrangements. The Group may experience difficulty in obtaining satisfactory financing terms and failure to obtain adequate financing on satisfactory terms could have a material adverse effect on the Group's results of operations or financial condition.

Market risk

Market risk is the risk of loss that may arise from changes in market factors, such as interest rates and foreign currency exchange rates and the movement in capital markets.

(a) Interest rate risk

The Group has cash balances only and it has no interest-bearing debt. The Group's current policy is to invest most of its excess cash in interest bearing accounts or term deposits with large reputable banks. The Group periodically monitors the investments it makes and is satisfied with the credit ratings of the banks holding the cash and short-term deposits of the Group. An absolute increase or decrease of 1% in the annual interest rate would not have a material impact on the net profit or equity at September 30, 2020.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

September 30, 2020

(Expressed in Canadian Dollars, unless otherwise stated)

(b) Foreign currency exchange risk

The Group's principal functional currencies are the Canadian Dollar and the Hong Kong Dollar. Sales revenue of the Group's food business is mainly denominated in Hong Kong Dollar, while the major purchases of the business are denoted in US Dollar, Australian Dollar and Euro. The major expenses of the Group are transacted in Canadian Dollar and Hong Kong Dollar. The Group is also subject to exchange fluctuations arising from the translation of the foreign currency monetary items of the Group's overseas subsidiaries. In addition, the Group's marketable securities, if partially denominated in foreign currency, are subject to foreign currency exchange risk.

Management closely monitors the exchange fluctuations of the principal foreign currencies of the Group's food business and uses means to lock up the foreign currency exchange rate of its purchases or transfers exchange differences to its customers to reduce the Group's foreign currency exposures. Management believes the foreign currency exchange risk derived from its other activities is low and therefore does not hedge the foreign currency exchange risk arising from these other activities.

(c) Capital market risk

The Group's current policy is to invest some portion of its excess cash in marketable securities, primarily shares of publicly listed mining companies. The Group sets investment guidelines, including pre-set targeted capital allocation and returns, exit and entry prices, and periodically monitors the investments it makes. The Group is satisfied with the financial and operating performance of the mining companies the Group invests in. An absolute increase or decrease of 5% in the investment return would not have a material impact on the net profit or equity at September 30, 2020.

26. Capital management

The Group considers its capital structure to consist of share capital, contributed surplus and deficit, which, as at September 30, 2020, amounted to \$23,153,099. When managing capital, the Group's objective is to ensure the entity continues as a going concern as well as to maintain optimal returns to the shareholders and benefits for other stakeholders. Management adjusts the capital structure, as necessary, in order to support the acquisition, exploration and development of its mineral properties. The Board of Directors does not establish a quantitative return on capital criteria for management but, rather, relies on the expertise of the Group's management team to sustain the future development of the business.

The Group is dependent on external financing to fund its strategic initiatives and exploration and project development activities in the long term. In order to carry out the business plan and pay for administrative costs, the Group will utilize its existing working capital and raise additional amounts when economic conditions permit it to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Group, is appropriate. The Group's capital management objectives, policies and processes have remained unchanged during the period ended September 30, 2020. The Group is not subject to externally imposed capital requirements.

27. Subsequent events

On November 2, 2020, the Company announced that it had made a binding offer to WISCO ADI to purchase WISCO ADI's joint venture interests in the Attikamagen and Sunny Lake iron ore projects in exchange for net cash consideration of \$1.17 million. The Company's offer to purchase remains subject to WISCO ADI's acceptance. If the Company's offer to purchase is accepted, the Company anticipates that the transaction would be completed in November 2020. Furthermore, if the transaction is completed, WISCO ADI would have no equity ownership in Labec Century or the Attikamagen project, and WISCO Century Sunny Lake or the Sunny Lake project, all of which would become 100% owned by the Company on a consolidated basis. WISCO ADI will continue to own its approximate 23.5% equity interest in the Company which will not be impacted by the completion of the transaction.
